## Latest amendments issued (2 of 2)

Category	Description	Release Date	Patch no.	S2S	WEB
CCS integration	Storage and consultation of the traffic codes issued by ANSFISA and ERA in PDF format: the safety certificate issued to RUs can be in the Customer Database	24/11/2020	4.19.0	NO	YES
CCS integration	During the traffic code evaluation phase, when there appears to be DG on the train, it will show whether the RU is authorised to transport Dgs on that route; therefore, when Dangerous Goods are transported, the RU will be able to view any sections of the PO not covered by the traffic code.	24/11/2020	4.19.0	YES	YES
RTO management	The reference date for the VCO lifecycle, which currently coincides with the measure activation date (requested by the RU on the RTO), becomes the path start date (proposed on the PO). All the VCOs that are in status 5, 6, 8 published at the start of validity date of the PO will be automatically included in the contract (moved to status 9). An alert will be activated to inform operators of the imminent contractual arrangement.	21/12/2020	4.20.0	NO	YES
Homepage	Requests for maintenance centre, water supply and Fast Track services: possibility of displaying the link to the page of the RFI portal where the request form can be found. <a href="https://www.rfi.it/content/rfi/en/railway-infrastructure-access-/train-paths.html">https://www.rfi.it/content/rfi/en/railway-infrastructure-access-/train-paths.html</a>	21/12/2020	4.20.0	NO	YES
